Cisco's Enterprise Mobility Management: In Retail

Meraki Systems Manager, Cisco's Enterprise Mobility Management solution, allows administrators to securely manage mobile phones, tablets, laptops and desktops. Devices, applications, and users are easily and simply managed via the Meraki Cloud Dashboard to secure corporate assets and improve IT process.

WHAT SYSTEMS MANAGER (SM) DOES	HOW SM SOLVES RETAIL USE CASES
TOTAL ENDPOINT MANAGEMENT Smartphones, tablets, laptops, desktops, servers	Monitor, provision, and secure Point of Sale, Kiosks, Back of House, BYOD & Corporate assets.
MANAGED APP CONFIG & CONTAINERIZATION Push and secure public and private apps and content, App/Play Store integration, cloud hosting	Update and push software (e.g. Enterprise apps). Containerization to protect apps & data for private and cloud hosted data. Managed configurations for apps.
IMPROVES SECURITY Enforce encryption, passcodes, restrict access, & track	Lost mode, geolocation, and security compliance (e.g. jailbreak detection) to secure and track all your devices.
SAVES TIME Automatic device enrollment, dynamic policy management	IT time is costly. Simple device provisioning of Wi-Fi, Apps, & security with easy cloud management saves money.
SPECIAL 'BONUS' FEATURES! Kiosk mode On-demand Update OS remotely	• Single click deployments for Kiosk mode on iOS and Android tablets • Remove Kiosk mode and easily update apps remotely to improve IT productivity and workflow • Update Operating Systems (e.g. iOS) remotely and stay up-to-date on security patches and features

Simple Pricing

With Cisco's EMM, one license includes all features, even 24/7 support, regardless of device type.
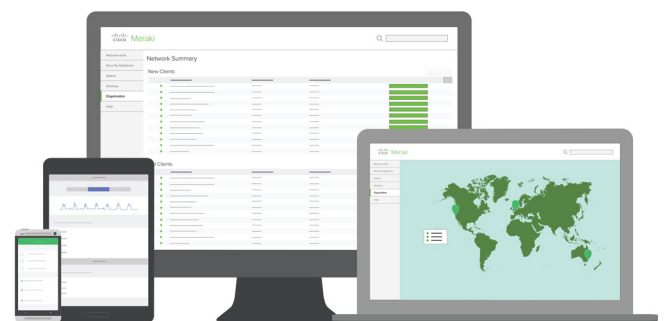

What Customers are Saying

"My goal as an executive is to bring our services to a higher level and do it better, faster, and for less; the Meraki tools allow us to do that" — Doug Reczko, VP of IT, Brookstone

"If it has a power plug, we look after it. Meraki has made looking after these devices much easier"
— Jim Catelli, Systems Administrator, Sealanes
